FOR IMMEDIATE RELEASE

BOULDER GREEN LEADERS SUPPORT BALLOT INITIATIVES 2B AND 2C TO FULLY EXPLORE A CLEAN ENERGY FUTURE

The Boulder Green Building Guild fully supports Ballot Initiatives 2B and 2C.

We strongly encourage City of Boulder voters to approve both measures to provide the City with the ability to gather the information necessary to make the most informed decisions possible and to keep the City's options open as they strive to meet clean energy goals.

In order to meet these goals we believe that additional strategies are necessary to encourage more investments than currently exist in demand side management (energy efficiency) and renewable energy sources.

At this time there is insufficient information to know if municipalization is a desirable path, or if a meaningful partnership with Xcel might prove to be a better choice. Passing 2B and 2C is the only way that the City of Boulder can fully understand all the options available in their essential work towards protecting the interests of our community and future generations.

We look forward to seeing a variety of choices to design and negotiate our power, including potential alternative proposals from Xcel, as outcomes of the passage of Ballot Initiatives 2B & 2C.

About BGBG

The Boulder Green Building Guild (BGBG) is an association of building professionals dedicated to promoting healthier, resource-efficient homes and workplaces. Since 2004 the non-profit organization has grown to over 600 members. Our vision is to empower people to build healthy, resource-efficient communities. For more information on membership, events and involvement go to www.bgbg.org.
